Rubaroc combines more than 26 years experience, in the field of wet pour rubber installation and rubber surface solutions.

We combine high tech polymer resins with rubber granules, mixed onsite and hand trowelled to your specifications.

Rubaroc has its own unique wet pour rubber and are recommended installers for many other rubber granule surfaces.

Enquire about our range of colours and combinations or customise your surface by mixing colours to suit your own design palette.

Rubaroc expands and contracts to accommodate temperature changes and ground movement. Our surfaces are installed in accordance with Australian Playground Standards, and are slip rate tested, providing a resilient, safe, cushioned surface which is virtually indestructible

Our fully trained team will install Rubaroc over your existing surface.

We are experienced working with Tier 1 construction companies, considered the largest and most experienced in the industry, and pride ourselves on being a professional, flexible and reliable workforce.

Rubaroc is installed Australia wide and overseas - providing you with the best surface that we are truly very proud of.

Every Rubaroc installation is given 100% from our dedicated staff, and we look forward to working with you on your surfacing projects.

Our Head office and warehouses are in Melbourne, Australia.
